PROFESSIONAL SUMMARY

Final-year International Facility Management student at Breda University of Applied Sciences (Data Science & AI minor), graduating June 2026. Six years of operations experience progressing from reach truck operator to all-rounder coordinating shifts of 50–100 at Jumbo Breda, plus a six-month finance internship at Avolta in Helsinki where I built passenger-flow forecasts and process automation in financial department still in use across the Sweden and Finland teams. Looking for a graduate role in data, BI, or operations research.

SELECTED PROJECTS

Intelligent Occupancy Detection

Live · Streamlit

Python · XGBoost · Streamlit · Plotly · Pandas

- Real-time room-occupancy classifier built on four sensor inputs (temperature, humidity, CO₂, light); ~85% accuracy on validation.
- Designed a Champion vs. Challenger evaluation pipeline covering data cleaning, feature engineering, and model serialisation.
- Deployed as a public Streamlit app — office-occupancy-app.streamlit.app — with source on GitHub.

Atrio — FM Co-pilot

In development · 2026

Llama 3.1 · NVIDIA API · RAG · React · Python · Vector search

- LLM-backed assistant for facility-management teams; retrieves context via RAG over building documentation and historic tickets.
- Auto-creates work orders mid-conversation, shortening the path from “tenant reports an issue” to “ticket in the system.”
- Architecture: vector search → Llama 3.1 reasoning → action layer (auto-ticket, escalate).

Nuclear Energy SDG Dashboard

Five-page report

Power BI · DAX · Excel

- Multi-page Power BI report on nuclear adoption and grid carbon intensity across European countries.
- Identified a -0.40 correlation between nuclear share of generation and grams of CO₂ per kWh.

DKG (De Keuken Group) Logistics Optimisation

Client project

Python · Heuristic algorithms · 3D visualisation

- Truck-loading problem for DKG Keukens: mixed cargo of heavy and fragile kitchen units in a single load.
- Tested ML approaches first, found they produced mathematically tidy answers that ignored physical constraints; pivoted to a heuristic with a 3D packing visualisation.
- Delivered a working prototype plus a structured R&D map of approaches that don’t fit the constraints, accelerating the next team’s work.

EXPERIENCE

Finance Department Intern

Feb 2024 – Aug 2024

Avolta — Helsinki, Finland

- Built weekly financial and KPI reports comparing forecast vs. actual passenger volumes; flagged scheduling adjustments for management review.
- Developed Excel and process automations still in use across Avolta’s Sweden and Finland finance teams, saving several hours of manual reporting per week.
- Reconciled transactions to maintain the accuracy of weekly financial records.

- Authored onboarding documentation adopted for new hires and interns in the department.

All-rounder / Assistant Team-lead (in everything but title)

2022 – Present

Jumbo Supermarkten — Breda, Netherlands

- Coordinate operational support across shifts of 50–100 employees, keeping the warehouse floor running and resolving day-to-day issues.
- Prepare planning for upcoming shifts and surface operational data to inform management decisions.
- Operate Warehouse Management System (WMS) for workload tracking and logistics flow.

Front Desk / Baliemedewerker

2020 – 2022

Jumbo Supermarkten — Breda, Netherlands

- Inventory oversight, shift reporting, and WMS operations across the distribution centre.
- Supported colleagues with operational questions and escalations.

Reach Truck Operator

2019 – 2020

Jumbo Supermarkten (via Otto Work Force) — Breda, Netherlands

- Operated reach trucks across the distribution centre and trained new operators on safety procedures.

Logistics · Cross-border Restocking

2017

KODANO S.A. — Kraków, Poland

- Coordinated restocking with the Hungarian branch — order picking, parcel preparation, and international shipment.

EDUCATION

BSc International Facility Management

Sept 2022 – Jun 2026

Breda University of Applied Sciences — Breda, Netherlands

Minor: Data Science & AI — machine learning, data engineering, applied AI.

Economist Technician (secondary)

2010 – 2014

Zespół Szkół Ekonomicznych Nr 2 — Kraków, Poland
